UWA Marine Energy Research AUS	Wave Hello to Renewable Energy	Funding from two Inspiring Australia "small grants" (total \$6,000) went towards construction of two portable water tanks that demonstrate the concept and industry application of wave energy, ocean engineering challenges in offshore environments and coastal processes. Props also include 3D-printed models of wave energy technologies. The activity can be taken to schools, festivals or any venue with access to water. The UWA Marine Research Facility also hosts a stationary 3-metre wave flume that is useable with the same array for props. The activity is great for any audience and also a focus on STEAMI Careers.	Hands- on/Interactive	Several times per year/Regular	General Public (any age)	Discovery Bay, City of Albany	GOAL 7: Affordable and Clean Energy	GOAL 9: Industry, Innovation and Infrastructure	GOAL 13: Climate Action	wiebke.ebeling@uwa.edu.au
